

Understanding your students' Arabic vocabulary levels has never been faster or easier. Lexica Arabic provides the first corpus-based test of Standard Arabic vocabulary. Immediate, valid, and reliable data will help identify language levels of incoming students and show progress over time. Delivered on computer, tablet, or mobile, Lexica is instantly scored and fun to use, making data-informed decisions possible.

Lexica Arabic is based on an innovative and well-researched model for quickly estimating general

language proficiency. It is designed to measure receptive word knowledge for native speakers of Arabic. It can also be used as an initial placement test for English speakers who are learning Arabic as a foreign language, and as an ongoing measurement of progress in vocabulary growth through the academic year.

## Lexica Features:

- 🕒 Web-based
- 🕒 Takes just 10 minutes
- 🕒 Instant results
- 🕒 Computer Adaptive
- 🕒 Accurate and reliable
- 🕒 Bilingual interface
- 🕒 CEFR-based placement recommendations

## Fast & Easy to Use

Whether taken on a computer or a mobile device, the test takes just 10 minutes with results available immediately upon completion. Results are reported as vocabulary level scores linked to corpus-based word frequency ranges, which are aligned to Common European Framework of Reference (CEFR) levels.

## Built for Education and Workforce

Lexica Arabic has a broad application across the full range of educational institutions and corporate HR departments where language knowledge is a critical component for decisions to be made upon entry into an Arabic-medium environment. Quick, easy to administer and affordable, Lexica Arabic gives administrators reliable data to estimate an individual's general proficiency in Arabic.
